(Cardiovascular Research Institute [Japan])

SUPERVISOR

Prof. William Lombardi
(University of Washington [USA])

INTRODUCTION

Join us for an exclusive educational session featuring Dr. Mashayekhi as the operator, where we explore contemporary European interventional strategies and procedural techniques. Through a real case demonstration, you will gain valuable insights into case planning –utilizing ESPELUX Edu as one of the references for pre-procedure measurements- and decision-making, while highlighting Dr. Mashayekhi's approach to CTO-PCI. Whether you are looking to refine your approach or broaden your international perspective, this session provides a unique opportunity to experience global techniques while staying in Japan. Do not miss this opportunity to learn from a European expert.
